Globalisation and growing competitiveness have led to an increase in uncertainty with regard to companies decision making. Flexibility to react to this uncertainty has become more important. The question arises whether there is a need for a further investment appraisal technique or whether traditional techniques can cope with that. A growing literature about real options shows that traditional investment appraisal techniques do not value flexibility. That is why ROA has become more important within recent years. However, the degree of its utilisation by companies seems to be rather low. Three possible reasons for that are examined: ROA is not well-known by companies, especially small- and medium-sized enterprises. ROA is only limitedly applicable. ROA is too difficult to use. After traditional investment appraisal techniques have been outlined, the real options approach is illustrated by...
