*A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).

Chapter 2 The Benefits of Controlling Water Pollution This section of the report presents a state-of-the-art assessment of the national benefits of controlling water pollution. A broad spectrum of studies has been reviewed for information on water pollution control benefits. The information is fragmentary and localized, requiring questionable extrapolations to develop estimates at the national level. Table 1 summarizes the availability and reliability of the information contained in these studies. Table 1. HEALTH DAMAGES Nature and Effects of Water Pollution Damage to Health The negative effects of water pollution on health were the earliest motivation for water pollution control. Even at present levels of wastewater treatment and municipal water supply treatment, harmful pollutants can be ingested and cause disease. Bacteria and viruses are the primary pollutants threatening human health, although recent attention has also focused on carcinogens. Among the diseases that have been investigated are gastroenteritis (including nausea, stomach cramps and diarrhea), infectious hepatitis, meningitis, congenital heart anomalies, and acute myocard. . .
